Coral App Changes

Overall Design / Home Page

- Change “edit” icon to a “plus” for new
- Change botton nav bar order
- Make layout standout more. Make the color scheme less dull, make it pop
- Change the icons to be words instead of icons, for clarity
- Make the scheme not boring
- Change the countdown for deletion to “Are you sure?”
- Add details for the checkbox
- What is the download button for?
- Decrease the amount of clicking in general
- Make current home page a “reports” page and make the home page simple with large buttons to navigate easily to each page instead of the menu icon in the corner
- Add info for getting to gallery/about/help page if not implementing point above

Survey Page

- Add titles for each part, especially for the coral types
- Add info describing each part
- Clarify what the additional comments are for
- Clarify what the email is for
- Verify the email is in a valid format
- Clarify more than one coral can be selected
- Didn't know where to click to enter text, make the text box its own separate box underneath the question itself
- Make sure people know to scroll down
- Remove the delete button from the review page
- Remove review page?
- Add descriptions for each title
- Change drop down box to a selection box

About Page

- Break up paragraph more
- Make it more eye-catching
- Add a picture of Natalie, make it professional
- What does “phenological” mean?
- Too much text in general

Help Page

- Remove links in help page. Either don't work or are redundant
- Add FAQ
- If numbering errors, have a section for help on each error
- Make sure the help page contains information for our app, and not the old beach app
- Keep the titles, they are nice to have

Gallery Page

- Implement the page

Code/Back-end

- Survey doesn't get deleted immediately
- Uploading a survey doesn't work
- Surveys don't save correctly
- Portions of survey auto-fill with junk
- Make error messages more descriptive, maybe include a number for the error
- Implement gallery
- Make sure photo upload works
