Scientist Meeting 5 Notes:

Location: Library 236 using Zoom

Date: March 20, 2019

Time: 3pm - 4pm (1 hour)

Attendance: Jessica Brassard (via Zoom), Paige Short, Marissa Schulz, Zach Nicholas, Suzannah Lenz

- Datasheet settings: selections determine what pops up for datasheet creation
- If done on a smartphone, would grab phone's location

- Datasheet Options:
    - Edit
    - Text
    - Date/Time (sub/additional/extra)
    - File Upload
    - Images
    - Likert Scale to submit certain sets of information (Ex: pH scale)
    - Location (Additional location)

- Must know Who, Where, When for all data creations and entries

- Communicate to people the different sections of creating a datasheet

- Wizard/one at a time method to work through datasheet
    - For basic information
    - Working through steps instead of all at once

- Template option for Datasheet Creators
    - After Wizard
    - What to provide can be difficult
    - Based on existing data

- Look on form creating competitors and see who is doing what
    - What works
    - What doesn't work

    - *Problem for CitSci is complication of a science survey*
- ***Survey123***
    - Environmentally smarter forms and data collection

- ***SurveyMonkey.com***
    - What works for them
    - How do they build a survey

- ***Amazon Mechanical Turk***
    - Paying others to take care of your tasks
    - Worker and Requester Accounts

- Simple people who want to enter as little as possible and others who want to enter as much information as they can
