The Team:

Steve Tracey

Dillion Mavroulis

Micah Kempf Jon Booth

Alexis Kuprel

Matt Dean-Hall

Dalton Shoebridge

User Personas Bill Smith - Admin

- PhD in Volcanology from Stanford
- Masters in Volcanology from Harvard
- Bachelors in Electrical Engineering and Volcanology from Harvard
- Fluent in English, Spanish, and French

User Personas Timmy - Tourist

- 12 Years Old
- Researched Volcanoes on Wikipedia and watched a couple of youtube videos
- Fluent in English
- Rich parents are taking him on a trip to visit Pacaya

Nominal Use Scenario

■ Tour Guide/ Tourist:

- Lands on home page
- Navigates to set of forms
- User selects the plume form
- Enters in a height of 100 meters
- Selects white for color
- Uploads a picture taken of the plume
- Hits submit
- Brought back to the form selection page
- Quits the app 'cause he is done

Nominal Use Scenario

Admin (Scientist for example)

- lands on the home page
- uses the navigation bar to navigate to the admin login page
- logs in using his username and password
- the admin sees a list of submitted forms with the option of deleting or viewing the form
- o the scientist decides to view the latest form
- o the scientist can then edit the form or go back
- The scientist closes the app after viewing the form

Usability Goals

Motivating

- All data is provided by users
- Users do not get material compensation

Efficient

- Users will be on tours/giving tours etc.
- Too much time can't be spent figuring out/using

Informative

 We want the data to be useful and informative to Pacaya

Cognitive Walkthrough

Usability Concerns

Useless Posts

 Will the app be able to deter users from taking useless pictures or inconsistent data

Language

 We will have two different sets of users that may be using multiple languages.

Do they Care

 Why would a tourist want to use this app and how can we make it interesting to use.
