

Client Meeting #3 02/16/2016

Add an option to continue current transect in addition to start new transect, and end transect

Should keep 3 forest types, do not include "I don't know"
-perhaps add images as a pop up to help non-student users in the future

Teacher reviews data
-delete whole transect, not just partial data

Link research to high schools/middle schools not just teachers
Include school name and zip code in database information

Appearance:

Liked high contrast colors

Expressed concern about color blindness, and asked that we not use red since we are using green.

If we use CSS coding that includes red for errors, to also include glyphs and/or written error message
