

Client Meeting #2, 01/28/2016

Ask who will be doing the monitoring of what paths are good to take (teachers, students?)  
Should the artwork be geared towards a younger audience?

Metric measurements

Art:

7th 8th 9th grade target audience

Databases:

No current data that would be collected in this way

this data is put into a spreadsheet

GPS

who

where

the nests that they found

Each row in the spreadsheet is a transect

think about how to allow for nested posts

Teacher's name, grade, school

Instructions given: try to work in different areas

more concerned about where these mounds occur

app appearance:

try and balance fun and scientific

When a kid first sees it it looks interesting and fun.

not for the kid to think it was a cartoon.

perhaps sharing of email address with the teacher
