Team Meeting (2016-2-2)

Google Hangouts Chat

Start: 5:57
End: 7:07

Discussing the Third Assignment
        Paper Prototype
                Different Layouts for tablet or phone
        Discussed working with GPS data to obtain city/state information
                Perhaps remove the user input for location data

        When the App starts:

                Home :   Name
                                Teacher
                                Teacher's E-mail address
                                Forest Information
                                        Type
                                        4 Most common
                First base :   Transect Page

                Mound Page :
                                Info/Image

                Final Picture: Picture of where they stop
                                Continue Transect
                                Stop altogether`

                Review Page:

                Thankyou:

        Link to home button at Thank you Screen

Use Scenarios:

        Technical problems that may arise from data type inconsistencies

Usability Goals and Concerns List:

        Get a google doc up and have everyone pitch in

Title Name:

ObserveAnt

Usability Goals and Concerns List Will be worked on by everyone

Team Member	Status	Impediments	Promises
Colin Hogue			Work on the PowerPoint/Data base Schema
Tory Taggart			Use Case
Kathryn Van Susante			Will Work On Paper Prototype/Wirefr ame
Evelyn Adler			(not at meeting)
Joan Perez Guerrero			(not at meeting)
Matthew Kersten			PowerPoint
