Scenario

User Persona's

What's a transect?

Describe it, or rename it

Usability Concerns:

Incorrect/false information supplied

Connection with the server goes down

Different views:

more likely than not, a phone will be used

Don't have to concern ourselves too much with other views (scaling)

No need to worry about user profiles or security just yet, this is a prototype.

Should have a name, or teacher name, so we can organize

email should be used somewhere

teacher's name, your name
