

Map

- Arcgis visible extents

Get rid of gray map

Old Maps set visible extent (Don said he had it open)

App - The Rural Keweenaw KTT

1940s 1950s 1:24,000 Map

- further zoom level

- if not : 85 draws way out

- the zoom in 50s?

- Old maps don't draw till you zoom way in

purple for current, actual points

- do an image for a point -
- "in the vain of what google does"

purple for point already there

point person is working with "pretty big" "pretty obvious"

- as downtown could get crowded

- A LOT BIGGER

Point 'fade' zoom way to much

- back it up a little bit

purple for everything,

- green selected (maybe purple around it)?

"Facebook Comment Plugin" - remove it, hide it

- Object Invalid Issue

- Comment System Crapped out

- did not post on Facebook

- Maybe Multiple Facebook Accounts logged in?

Change Name question thing to "Your Name?"

Database - Text Description issue

FIPS = fire insurance plans draw at 1:24000 and closer

Reverse Geo Location Search -

- One for each decade
