

## Team Two: DNR Drinking Water Inspection App

Sophia Farquhar: Stylized the website, completed the style.css file and added the WI DNR logo to the website. Ensured all the elements were the same. Wrote the HTML for Element Two.

Jordan Gagnon: Wrote the HTML for the General Information tab. Added all the counties to the county box in the General Information tab. Wrote the HTML for the Element Four tab.

Cory Kroes: Being the tech lead, Cory kept the Master up-to-date and handled the merging of the files of elements. He worked on the JavaScript for the app. He wrote the HTML for Element One. He also made changes to the way the elements toggled open and closed based off of what the user clicked. Cory added the coloring of the elements.

Nichole Mackey: Wrote the HTML and JavaScript for the Corrective Action Element. Worked on the printing functionality with Mark. Began to add in error checking for the elements. Handled communication with the scientists.

Cameron Pollock: Wrote the HTML template for the elements. He wrote the HTML for Elements Three and Five.

Mark Schlax: Wrote the HTML and JavaScript for the print functionality which included forcing all the elements to open once the user clicks the print preview button. Aided in writing the JavaScript for adding and removing the corrective actions.
