

- Do users log in as beach managers?
 - Authentication will be handled on their end
- Dropdown vs type ahead
 - Type ahead
- Part of a composite checkbox
 - User may not understand
 - Prompt should say “Composite Sampling” or “Composite Sample”
- Submission authentication
 - User will have to log on using different page to get to submission form
 - User table, and table to link users to beaches which determines which beaches users are allowed to enter data into exist
 - Just input ‘surveyor name’ in field?
 - No login on app? -> Just save local copy which could be uploaded on a DNR(?) website
- Users will need a local copy of their data (csv?)
- Make sure that there is a textbox for user comments
