

- Add a warning to notify users if not all fields are complete - if they understand, they can still submit and download a csv
 - Usernames - anybody could technically be put in
 - Dropdown of surveyors
 - Need to record information about who filled out survey
 - Two entries - one textbox - one option for id
 - ids change often - concern about maintaining static list of users
 - Upload csv from WI Beach health website
 - Match with Beach ID number
 - Exception table for user-defined beaches
 - Clarify that floatables are actually debris in water
 - Collect sample button for date/time
 - Start time, end time, sample time
 - Composite has samples at different locations
 - Just have a page for collect sample with date/time
 - Add composite sample on this same page
 - Composite sample means there are different samples for different monitoring sites
 - ECOLI_SAMPLE_TYPE?
-
- Incomplete surveys - warning "You haven't completed all of the required fields, do you want to submit this?" - if yes, allow submission
 - Don't know who all crews are
 - There are specified users for some organizations
 - Traceability - indiv doing survey may enter any name & affiliation - this provides enough traceability
 - List of users exists as a dropdown - must pick from a dropdown on existing survey
 - We need the list - only if we end up handling this
 - One entry - textbox for name (save as "favorite")
 - Optional user id - textbox
 - How do we load in list of beaches? List of users?
 - Maintenance - needs to be written - may need to be a UI
 - Might be a file dropped in place somewhere
 - Make sure we send textual contents of beach/site etc - used in exception table for custom entries
 - Floatables/debris - add FIREWORKS (???)
 - Quotes in quotes - are they escaped properly?
 - Two date/times captured
 - Start of survey
 - When sample collected - button when sample collected -> fill hidden field
 - Maybe a separate page

- “Click here when you collect the sample” - show date/time when pressed
 - Include “Composite sample” on same page
- Composite sample submission
 - Reformat CSV
 - Submit all in composite sample in same CSV
 - Since decided against
- Get deployment instructions ready
 - Will need backend/maintenance/etc
