

Meeting Minutes 2/8/17

- Possible to add a 'favorites' list of beaches
 - Add beaches not listed by county -
 - Take date/time automatically from phone
 - 'Hamburger' feature for jumping around = good!
 - There is a logical order
 - Visual observations
 - birds/wildlife/people
 - Visual wind/weather
 - Collect sample - Nice if date/timestamp for sample collection
 - Possible for intentional survey submission with blank questions
 - Analysis date not needed for app
 - Analyzer - E Coli Not needed - Composite sample is though
 - Lab analyzer/comments not needed
 - KEY DATA
 - Beach, site, sample date, time, sampler
 - Preference that required fields are completed
 - Turbidity measurements OR Secchi tube, or prompt if both missing
 - Issue about editing the form could consider submission as final
 - Flag for review with comment?
 - Reminder email?
 - Sensibility checks - water temp - wave height
 - Drop down units with default
 - Wind direction: Degrees or N,NE,etc.
-
- Check marks for finished sections - Great!
 - Prompt for incomplete forms
 - Comments on past survey - comments section, not in survey, but generic notepad reminders
 - Wait to submit a bunch of surveys at once
 - Wet hands vs dry hands for ordering questions - algae.... Water temp, wave height, turbidity...
 - Grouping radio buttons together - logical
 - Delete function - question user why they need to delete this
 - Keyboard next/prev button (if possible)
 - Default monitoring site is center of beach
 - Composite sample means different monitoring sites (other than center of beach)
