

ACLIP Design Change Document 1  
2/18/2018

1. Changes to the score screen
  - a. Instead of displaying "Question 1" on the display screen we will display the full question along with how you answered the question. This will make it easier for the users to view their results.
2. Disclaimer on webpage
  - a. We will add a disclaimer stating that this information is not medical advice. The disclaimer will also state who the information is intended for. This is important when dealing with medical information as we do not want to be liable.
3. Changes not implemented
  - a. Login System - Scientist said user accounts were not important.
  - b. Grad Student's proposed the idea to track return users because they thought this information might be important to our scientist. Erich does not care about this so we will not implement it.
