

Timestamp	4/18/2018 16:02:05	4/18/2018 16:12:46	4/18/2018 17:38:52	4/19/2018 18:26:27	4/19/2018 19:16:04	4/20/2018 14:24:46
How old are you?	18-24	18-24	18-24	18-24	18-24	18-24
What gender do you identify with?	Male	Female	Female	Male	Male	Female
What is your ethnicity?	Caucasian	Caucasian	Caucasian	Hispanic or Latino	Caucasian	Caucasian
Do you own a smart phone?	Yes	Yes	Yes	Yes	Yes	Yes
I am comfortable using technology (e.g. computers, tablets, cell phones...)	5	4	5	5	5	5
I am familiar with wet/dry mapping.	1	2	1	1	1	2
I am familiar with UTM coordinates.	3	2	4	1	1	2
I found the instructions to be clear.	3	4	3	3	5	5
It was easy to learn how to use the application.	5	5	4	2	5	5
It was easy to correct errors and edit data.	5	5	5	5	5	4
The design of the application is simple and effective.	5	5	5	2	5	5
I enjoyed using the application.	5	4	5	2	3	5
Describe any areas of the application you found confusing or difficult.	While entering coordinates in UTM-E, it's easy to make typos or enter an extra / too few digits. While the app automatically detects this, something to help the user format their coordinates (automatically spacing after the first three characters, preventing excess characters from entering) might help with this. The process of entering team information streamlines nicely into data entry. I found that the automatic switch between start/end wet spot helped me keep track of where I was in the mapping process.	I had no difficulties. I specify if units are needed for accuracy	Entering and editing/removing was simple and easy.	Easy to get started was difficult after several were already created	Beyond initially reading the instructions, there weren't any major issues with using the application.	I am honestly quite unfamiliar with wet/dry mapping and the usage of UTM coordinates however the instructions were extremely well written. I also really liked the fact that the application allowed us to individually add in the names of our group members and that we were given the ability to title our data. If a person were to be doing wet/dry mapping at multiple locations, they'd be able to title their data based on what location they're researching, what day they are recording, etc.
Describe areas of the application that you liked or you thought was well done.	In the instructions, at the 'one last waypoint' step at the end of Task 2, I was unsure whether it was intended that I enter a normal data point or a End Reach / Finalize point. I nearly Finalized the data at this point, and wound up backing out once it was clear that this would submit the data and prevent the execution of the edit/delete segments of the instructions.	I can now be a professional wet/dry mapper.			This application was simple to learn to use; however, my familiarity with technology makes this biased. Thus, the provided handout/help button will be useful to those not technically literate.	Overall, the application was easy to use and offers a convenient means for people to be able to record data for wet/dry mapping.
Do you have any other comments about your experience with the application?
