

Attendees: Andy Kirkum, Mike, Kristof, Jeremy, Christina
Both grad students, Zach, Robin

Start time: 4pm
End time:

Ryan, Sarah Scarlett, Don L. → big picture.
↳ good resource for SW Questions

Meeting Room:
GLRC
316

Goal: Filter Stories by type, want to "pull" people in → go down rabbit hole

Bring in more datasets, can access about 300,000 points out of ≈ 3 million?

Each building pulls stuff through PHP to get data when clicked on.

↳ about 700 stores currently, but needs to set up scaling

Stories - Adds an element - user contributed, allows people to share info, memories, fam histories, photos.

- this should be a way for people to get "lost" ← big idea
- How can we use this to start conversations w/ others
 - both people who live here and people who have ties

- want to be able to search all stories
 - when searching, can find stories & names
 - searches all contents of post.
 - Uses → ACRGIS, postgres Data base?

- Classes; building, stories, people (PHP scripts)

→ layered filters → need to be able to filter by more than one thing. Date, year, date range on top of searches
↳ Ethnicity

→ Limiting search results to 50, can't get to next "page"
- load more button, next page (Ideas)

Improvements are possible to make on whole project
→ consolidate layers, less legacy code (if possible)

Read Over:

November 2017 archive has launch details
November 2018 archive has 1 year update notes } Gives some History of the app Dev.

Communication: Slack chat with scientists.

What we need to do:

- Change how query works. → they're stored in blob files, so probably not?
- who wrote it, if it has media (what type?)
- things to search by.

way the map works: Don't like pink dots
→ need to change as query changes. (change color or some thing or maybe remove?)
→ support on doing symbology w/ Ryan

→ think about this in terms of scaling

→ there's a flag to remove data from front end. Also, must keep this functionality, flag for bad content

Action Items: Play with App
get some Ideas for searches & large scale

~~Meet Alex~~

No meeting Next Friday: → AOB building? Next to RDTC
4-5 for Presentation - Feb 1st

Meet Friday 8th 4-5pm For second meeting
