Design Changes to Consider After Final Walk Through

The Survey

Change the label “Sport” to “Primary sport”
Change the lable “Sex” to “Sex of Althlete”

The Results Page

The result page will have a color coded bar with a high and low point and a bar on it marks where you are. Along with the graphical representation of a number out of 500, there will be 500 people and based on your risk it will change the color of that many people.

We will add the preventative training info link when we have it.

We’re also considering adding sub labels as a further explanation.
