– Discussion Items (Things to be added in future version)

Confirm compatibility with mobile devices.

Ensure record type filters would need to work.

Ensure modal's scale to more into.

Modify the existing php search scripts.

External links open new tab rather than redirect from the page.

When a filter is clicked update the available results number next to each category.

Add the ability for users to post a link with information on it so when it's clicked the user is brought to that search.
