Change the plus sign by the filter categories to arrows like the main category titles use

Filter heading should be different color than the results category headings

Title for the buildings category should be consistently “Buildings”

“Clear Filters” button should be gray and “Apply Filters” button should be a bright color, possibly the same shade of green as the website logo

Clicking on the map or on a story point should clear the search and filters

Add a “Restore Search” button by the search bar that appears after the first search and allows the user to backtrack on their search or keep track of an important search that they’re using (maybe be able to share to Facebook?)
