

4/14 - 4:00 pm Usability Session

- Used about premortem more as a help in the moment
- Not sure how to start the process
- Facilitator role very unclear for starters -> maybe a more in depth explanation option
- "Next Step" should flash or indicate to show time is up or the alert should specify to press "Next Step".
- Need a way to reverse step, participant got confused and thought a step was just instructions. Was more understandable after one run through
- Possible layout change? -> better flow
- Didn't realize outside interaction was needed. Specify outside communication.
- Specify why a "Delete" button exists
