4/20/2021 Final Review with Client

- Went over bugs that have since been fixed after usability testing.
    - Air tile now doesn't prevent other tiles from being placed over it
    - Help button works now
    - Updated tutorial
- Went through existing concerns for newer versions of the app
    - UI element scaling/ text exiting the bounds of its box for some monitors and computers
    - More information always necessary b/c users will be middle-schoolers
        - Might not know how to read the graphs in the results page
        - Existing edge-case: overflow errors might distract them if they decide to make a number too big for the application to handle
    - Viral transfer through air tiles surrounding an infected host
    - Future development
        - Will want to comment our code/update the README file for future developers once our team graduates
- Discussed our project's acceptance to an IT conference on education technology
