

User Environment

The users will most likely be either a computer lab or classroom using the school's chromebooks and/or tablets during class. This is the primary environment, but users may also wish to access the simulation from personal devices for their own use, or if they are assigned to do so from home as homework.

Another possibility is that the class will take place in the gym or outside so that students can spread out. This is important to note since the lighting will be very different outdoors compared to in a classroom or a gym.
