

Final Design Changes Before Testing

Change	Rationale
<input type="checkbox"/> Rename "Mouse Data"	Add clarity to what this data is tracking, as it is no longer mouse data.
<input type="checkbox"/> Prevent Scrolling in analyze view	To prevent hiding the navigation bar.
<input type="checkbox"/> OffCanvas Right click should be replaced with popover	Provide feedback on where the user clicked.
<input type="checkbox"/> Comment out "Upload" Tab	Avoid confusion for functionality that will not be added.
<input type="checkbox"/> Add "Home" popup on page load	Provide context for what the app is and how to learn to use it.
<input type="checkbox"/> Make "X" button on the "Move drone" popup lighter	Make it easier to see.
<input type="checkbox"/> Fix cube alignment in the align view having no action	Inconsistent functionality.
<input type="checkbox"/> Hint popovers should disappear when you click on something else	Avoid screen clutter.
<input type="checkbox"/> Add a "X" to close hint popovers	Add a clear option to close the popover.

<input type="checkbox"/> Make "Not visible" button in path toggle easier to see	Make it easier to see.
<input type="checkbox"/> Redesign Path toggle to be simpler	Clear up unuseful white space; simple functionality should have a simpler interface.
<input type="checkbox"/> Fix bug with labeled inspection points missing sides on Viewer	Inconsistency.
<input type="checkbox"/> Load to Align or Analyze by default	As a part of the "upload" tab being removed, one of these tabs should load by default.
<input type="checkbox"/> Change Flight names to include pilots	Pilots have similar flights, so comparing them might help communicate flight path patterns
<input type="checkbox"/> Pilot flight paths should have the same color but different shades	To quickly identify which path belongs to the same pilot
