

Team name: Programming Analogies

Date: February 14, 2023 2PM EST for 30 minutes

Attendance:

- Professor Pastel
- Emilie Rummer
- Ethan Jones
- Jack Grant
- Josh Staples
- Kevin Kulich
- Dee Paulson
- Grayson Wagner

General Notes:

- Get started on implementation and deployment early rather than late
- We are fine with keeping the simplistic styling
- Already has 50 analogies that we can import
- Keyword search
 - JavaScript library to search for keywords
 - Maybe a tagging system that we will work ahead of time.
 - Decide if tags can be user-created or predefined
- Popularity is not an important feature, but we can implement
- Add more help for creating an analogy.
- Add a figure/video to an analogy
 - Maybe if we have time
- Comparing analogies
 - CSS to align each field
 - Ask Dr. Bettin about suggestions
 - Twitter Bootstrap
 - Maybe use grid
- Login
 - It may not be necessary/not needed, BUT if we need to have that security layer.
 - Okay to have since we don't want spam
- Okay that we have it be a desktop-only application
- Tooltip for help information
 - Also adding analogy information
- Priority
 - Search/view analogy
 - Create analogy
 - Compare analogy
 - Login
 - Media

- Other features
