

Scientist Feedback

- It would be helpful if for each analogy we have both sections open at each time
 - If analogy 1 has the source domain open, so does analogy 2.
- Hide dislikes for filtering
 - Don't have people spam dislikes just to mess around
- For searching, is there a way we can incorporate more fields for searching
 - Don't constrain it to the misconception, make it to any field
 - For us, this might be a challenge to implement
- Adding color would add strong visual anchors
 - Can stress the important information
- Test for mobile
 - We know this is going to mostly be a desktop application, but make sure mobile views work
 - Search bar
 - Comparing pages

UX Consultant Feedback

- Maybe replace search with home or add dedicated home button
 - Have a link to the home page
- Clarify what we are searching by
 - Some indicator by the search field
- Small instruction box for comparing analogies
- Have success/error dialog come from the top

Team 5 Feedback

- Fix the toggling of the table when comparing analogies
 - i.e., make the table only appear on one side when we have one analogy set to compare.
- If we have time, maybe add images (Memes?)
- Consider other success/error indicators in the create/edit analogy page for colorblind people
- Asterisks for required fields

Dr. Pastel

- Liked the highlight for tabs in create/edit analogy pages
 - Maybe add an asterisk as well
- Same feedback as UX consultants and Dr. Bettin
 - Search for more keywords
 - Home page link
 - Better workflow for comparing analogies
 - Help page
- Suggests to not pursue adding media
 - Will probably need a redesign

Overall TODOs

- Fix admin controller links & styling
- Searching analogies
 - Clear search button
 - Search by more fields
 - Sort search page by likes
 - Show/hide columns in search table
 - Button to take you back to home search page
- Comparing analogies
 - Mobile view accessibility
 - Prevent table from toggling to each side
- Quality of life changes
 - Help page
 - "Login to favorite analogies" message on view page
 - Confirm delete dialog
 - Error page matches website style
 - More color to the design
 - Colorblind accommodation
 - Hide dislikes
 - Alert dialog on the top
- Mobile
 - Make sure pages on mobile view are good
