Final Review Notes - 4/18/20

Team name: Programming Analogies
Date, time, and duration: April 18, 2023 4PM EST for 30 minutes
Location: Zoom
Attendance
- Emilie Rummer
- Ethan Jones
- Grayson Wagner
- Josh Staples
- Jack Grant
- Kevin Kulich

Notes:
- Maybe we don't need an upvote/downvote, we can do ranking based only on favorites
- Tagging system for categories of analogies, search by tag
- Tagging favorites/some system for sorting favorites (maybe folders)
- Include media on analogy detail page to help illustrate the analogy better (code examples, flowcharts)
- Visual indicator on the comparison page that you can change the accordion sections
- Visual indicator showing that you can click on an analogy row on the search page
- Start on tutorial page instead of search page
- Make registration confirmation green
- Make the create button more noticeable
- Zebra stripe rows to differentiate a little bit better
- Some sort of tutorials, but that was expected
