

Team Name - BFR group 2

Date, time and duration of the meeting - 2/3/2023, 12pm, 30 minutes

Location or Media of the meeting - on discord online

Attendance – list of team members present at the meeting. - akshay, ian, tony, connor, seth, dane

Action Items –

Frontend team: Tony, connor, akshay, ben

Backend Team: Ian, seth, dane

Discussions, Decisions and Rationale –

Start development with the beginning of the flow(welcome page, screening form, and risk level pages).

Develop css classes before html to save time with going back to each page and adding css

Create javascript functions to handle risk level calculations, dynamic content, and dynamic linking to risk level pages

Create backend and frontend branches on github repo so that the team doesn't individually commit to main often

Next Steps –

Frontend team starts with making the css files and classes

Backend team will begin with three separate functions as described above
