

- Do you have any color themes for design or similar websites as design examples
  - Aesthetics are up to us
- Would you like to have the ability to add or remove any additional questions to the questionnaire (as an admin)
  - Screening comes from two different screening forms from literature
  - Probably not needed - hard to say if down the road the screening will change
- The flow chart suggests a recommendation of AOP percentage between 40% - 80%. Should the app make this recommendation? What criteria/circumstances might affect this recommendation?(age? Fitness level?)
  - Base percentage based on how many BFR sessions you have had - start low
  - May want to add this question after the screening
  - Good thing to implement with database
- Different meeting times? (Possibly Thursday at 12:30)
  - Biweekly thursdays at 12:30 over zoom
- Set up next/regular meetings
- Go over app description
- Stretch Goals
  - ios / android app
  - Database storing user data
    - Security risk
    - Storing the pressure used and exercise data
  - emailing the information from the app to the therapist/coach
- Web app vs mobile
  - Web app with view settings that make it look good on mobile devices and computers
- Talks about hosting website after the class ends
  - Want to keep web app usable after the semester ends
  - Prioritize keeping it as independent from mtu as possible
- Have app ready for usability testing by mid march
- Issac will put reference images (i.e. technologies, where to measure circumference, etc.) in the drive
