Design Review Notes

Team 3:   PG&E Energy Reducer
Team Lead: Patrick Seidel
Team Members: Zayne Pepin, Nate Allsop, Peter LaMantia, Wes Alberg, Jack
                     Snowden, Jack Hayes

- More interactivity
    - Graph should have some features that the user can interact with. I.E. a horizontal line that can be moved to compare different usage costs.
    - Pan and zoom feature.
    - Horizontal line could offer average cost.

- Outages are misleading (no implementation)
    - Could replace with something else (or just free up the space for cleaner page)

- Energy Tips - where is it going?
    - Have a comparison to the average of households of different sizes, that the user can choose to compare against and have tips based on the comparison.

- Start with making the graph
    - We are free to start implementation now

- Liked the design although it's quite simple
    - Maybe add more pages?
    - More widgets?
    - Customization?

- Help, log out, Contact us are hard to see and should be moved to a better spot.
    - Help, log out into a user dropdown (at the top)
