

**Critiquing Group:**

1. Q: How will we handle duplicated pictures and datapoints  
A: Users would not be locked out from providing additional pictures or data, but it would be at the scientist's discretion to approve additional images of the same datapoint
2. Q: How will we deal with auditing large volumes of submissions  
A: It will be at the discretion of the researcher to approve submissions
3. Q: Is there an explicit list of green space types when selecting  
A: Yes, there is an explicit list of green space types for users to select from

**Scientist Mary:**

1. Q: Will you be able to make accounts anonymously  
A: The end goal is to have every user under a username, but it can be completely detached from the real person.
2. Q: Will users be able to download the pictures on the website  
A: Yes, they will be able to freely access the photos available on the website as well.

**Pastel:**

1. Q: Concerns regarding the number of different pages  
A: Prioritize our pages better, maybe streamline them
2. Q: Concerns with the general UI design.  
A: We will work together to get on the same page for the UI design colors and general template
3. Q: Are you getting the quizzes from the scientists/why is the quiz on another page  
A: No, we are creating them ourselves from education material and the quizzes will be located on the same page as the education material

**UI/UX Concerns:**

1. Q: Will there be flexibility for mobile devices  
A: Yes, we are considering mobile device formats
2. Q: Why include the ability to categorize datapoints when users are likely to provide bad data  
A: The scientist will be able to use submission auditing to determine quality/usefulness
