Final Design Presentation

<u>Critiquing Team:</u>

Q1: Are you planning on adding the functionality of displaying the image when selecting a green space on the map?

A: We are putting this as a stretch goal. The main functionality as of now is to simply display the data points we have been given by the researcher.

Q2: All data points are only in Detroit, will there be expansion of the map?

A: The map will be able to accommodate datapoints from all over the US, however; the provided data we have now is centered around Detroit

Q3: Do quizzes store information on the education page?

A: No they do not store anything.

<u>Pastel:</u>

Q1: Styling issues

A: Yes we are working on it over the next week

Q2: Why do we use bullet points, sections, and center alignment?

A: We don't know, we will change the course of future work.

Q3: What is the probability that upload functionality will be implemented?

A: The chance is low and is a stretch goal as such.

<u>UX Grad Student</u>

Q1: Mentioned completed database, where will the database live?

A: The database will live with the website
