

Design Change Document 2
Design Changes after Final Design Presentation
MTStats
4/4/2023

1. More functional stats for the player page
 - a. Track the wins and losses of the player for singles and crews.
 - b. Track and list a players wins and losses vs. each character. This information is used to tell what characters that the player usually wins or losses against.
2. Reformat of the data entry page.
 - a. The data entry page will now use a different css structure to make it easier for the user to navigate the page and diffenerate the data.
 - b. Will use boxes to separate matchs, and each round will have a list of games.
3. Events page quality of life change
 - a. Add the ability to individually collapse the events sections, such as current, upcoming, and pervious events. This will make the page cleaner and make it easier to acces the event that you need.
 - b. Stretch goal: ability to seach for an event by name for further acecessability of events.
