

Design Review Notes
2/14/2023

- Home page and events need to be mobile prioritized
- Can start implementing after this meeting
- Talked about organizing Work Jams (likely Tuesdays after class)
- White text on Gray background (should change)
- As much as possible allow information about tourney (rounds) entered beforehand
- Creating matching/entering data is one action, don't route to new page for both
- Look at widgets for implementing adding data into fields
- Add matches via the event page and enter fields maybe?
- Maybe look at simpler ideas for page formatting (vibe check)
- Minimize server calls
- Match data is most important for mobile activity
- Some sort of help page
- Priority List (Robert's View), talk to Scientist for her priority list
 - Event Creation
 - Match list
 - Recording Match
 - CSV Downloads
 - Bonus:
 - Profiles
 - Graphing
