Final Review with Client: Meeting Notes

App wasn't in a state when the team was testing it to where they'd be able to make a real decision of if they will use the app or not.

1. Thinks they like
    a. UI design and color scheme.
2. Things to add to a future version of the app
    a. Add web scraping from event websites (start.gg, etc.)
        i. Create events from scraping
    b. automated reports with official website.
        i. Stat reports
    c. Discord bot integration.
        i. A bot to automate game creation through discord
    d. Help page with definitions of terms/description of match types
        i. User friendly diagrams for match flow
        ii. Crew matchs are typically difficult for new players to understand. So a page dedicated to the flow of matches would be helpful.
