

Design to be changed:

- Rearrange the specific buttons on the submit form page
 - Put the latitude and longitude input fields right next to the map
 - Put the unrequired fields into the "advanced" field so that all the required fields are together
 - Move the Image button to the top of the page, under the header
- Move automatic upload of records into settings as a toggle
- Make the help text a larger font and add contrast to make it more readable against the green background

Changes to be made if enough time:

- Autofill out if typing in species
