

Suggested Design Changes for Final App

- Add Image Feature (often overlooked)
 - Verification prompt when submitting (“Would you like to add an image?”)
 - Visual indicator for record missing images in the manage records page
- Advanced Options
 - Add clarifying language (“These fields are used by scientists ...”)
 - Group some option fields if possible
 - Toggle some fields to “always” appear in the advanced options or not
 - Add “unknown” option to diseased and species fields
- Upload Record Button (in manage record page)
 - Have some responsive prompt when clicked
- Manage Records Page
 - Be able to view records made by other users of the application
