Meeting Date and Time

Wednesday, January 24th 2024 @ 4:30 - 5:30 p.m. E.S.T

Meeting Location

Zoom: https://michigantech.zoom.us/j/3133172563
Physical Room: HIDE Room

Interview Roles

Scientist
- Jessica Alger

Questioners
- Lela Root
- Kevin Bak
- Sean McFall
- Andrew Koman

Note Takers
- Matthew Cronin
- Maxim Reuchlein

Interview Questions

Interview Style:

Semi-Structured

Interview Questions:

General Scope and Functionality Discussion

- Since we have limited time to make the ideal app, what are the ideas you want to focus on the most?
- Do the users (high schoolers) need accounts?
- What system should be used to verify accounts, if any?
- Will moderation be in place to approve uploads? If so, who will be responsible for moderation? (Are teachers moderators?)

- For users that have accounts, what information do we need from them (Name, email, school…)
- Are we focusing on mobile or desktop users?
- Should the location data be coordinates or a drawn region on the map?

Deeper Application Information

App Aesthetics

- How do you want the site to look (background color, etc.)
  - Do you have any specific images you would like included in the informational portion?
  - What font types do you want to be used for the site?
  - Do you want something very simple with direct links or something more flashy like transitions between screens.

App Functionality

Conclusion:

1. Summarize the major findings of the interview.
2. Ask your scientists if they have any questions or comments that they like to make.
3. Tell your scientists that you will email them a summary of the meeting describing your understanding of the app.
4. Confirm your date, time, and media for your second interview with your scientist. (Same time next week)
5. Thank your scientists for the interview.
