Design Change Document - 2/20/24

Team Name: Sheep Wormers

Scientists Names: Janae Foss

- Removing pictures from the paper prototype

    - Not necessary and extra work to implement functionality

- Don't have an entry for age

    - Should just be calculated given DOB

- Include an option to do a full flock check or not

    - Might just want to check a certain sheep or group not the whole flock

- Check boxes for FAMACHA, FEC, or other

    - This makes the page less busy and will allow the user to enter data based on what option they select

- Add a Finish Flock Check button next to Add Sheep button

    - Allows the user to end the flock check when they are done

- Add the ability to manually configure/add a different dewormer to the list of dewormers they can select that was administered

    - Some non sheep related wormers are used and have to consider that

- Recommended next flock check should be customizable by the farmer

    - Scientist wants for when they complete a flock check, the user should be asked when the next flock check should be, rather than it being suggested

- After completing a check, display a summary of the check

    - Quick summary of a flock check should be available
