

Design Review with Dr.Pastel

Design and Implementation

- The basic design looks good
- We need to add the button for user to select the language
- Setting the default value for the app
- Discuss about the best way to display the code feedback to the user
 - Focusing on how we respond to the user with our “feedback”

App Content

- Adding help button for first time user
- Revision comparison

Implementation

- The error line are clear along with the feedback
- Processing for anti-patterns and displaying feedback
- Help system
- USer login and history
- Growth or analysis
- Put bin in get ignore
