

Meeting With Dr Linda Ott 4/19/24

Attendees:

Dr Linda Ott

Will Sisson

Alex McWilliam

Double check constraints works not only 1:1 time overlaps, but any overlap

Don't count TBD as a normal instructor or room when checking for double-scheduling conflicts

**Fit more courses at same time in calendar view** - increase max width to show 2 days over the whole screen, possibly select individual days to increase screen availability  
**(very important ^^^)**

Days checkbox instead of text input - keep it a text box because it's faster (less work)

Note field for everything (all domain objects that can be added or edited by user)
