

Final Design Feedback

- Report a review as inaccurate (non-privileged user)
- Trail markers/map on the Authenticated Homepage may be nice to have.
- Some sort of alert/notification to admin when danger is reported
- Description/change wording for danger rating
 - Maybe separate into needing maintenance and dangerous conditions
- I would make sure you give the Likert scale for "rate your experience" parameters (i.e. on a scale from 1 to 5 with one being great and 5 being terrible)
- Remember to weight caution based on recent reports
