

Final Meeting Notes

4/20/21

- Reviewed all the functionality of the app with Kristen.
- Showed some bugs that we will fix before the final deployment of the app.
- Discussed the Usability Testing
- Discussed areas of future development
 - Stream data upload.
 - Building API for directly interacting with the sensors.
 - Building and integrating the predictive model
 - Allowing for location selection on the map.
 - Features on the reviews page to help users understand trail conditions.
- Kristen liked the results.
 - Exactly what she wanted and was expecting.
 - Plans on having students and/or colleagues build on top of what we have.
- Kristen will be attending Naveen's presentation Thursday.
