

**Team Name:** The™ Team 1

**Date:** February 3, 2026

**Start Time:** 2:00pm

**Location:** In-person at Rekhi Hall G005

**Duration:** 75 minutes

Jira Website: [LINK](#)

Team Website: [LINK](#)

**Upcoming Assignment(s):**

- Project Assignment 11 - Design Review: [LINK](#)

**Attendees:**

- Caden Rose, Daniel Spade, Duncan McBride, Angelina Hulka, Benjamin Hellman, Zachary Latusek

**Action Items:**

- Perform cognitive walkthrough

**Discussions, Decisions, Rationale:**

- Is the help section being down the page or on another page sufficient?
  - We may want to put something at the top of the page too.
- When we give the result, should there be some explanation of how the result is determined, rather than only having this information in the about section?
  - Maybe have a little question mark button, similar to what you may see next to the security code field when using a credit card online, that when hovered over or clicked, has a small pop up with an explanation.
- When making the submission part of the page, make it obvious that you can upload a screenshot *or* paste text.
- Perhaps have the help section include information about how to report messages as spam.
- Show the result at the top of the screen rather than under the submission.

**Next Steps:**

- Meeting with the client to discuss cognitive walkthrough tomorrow, February 4th at 4:00pm
