

When making a recipe have it automatically add ingredients to the grocery list

Also allowing substitutions

Be able to plan based on a recipe already made but modified.

Have all my saved ones and a box to add new ones from scratch

Want the app to all be on the one page and differentiate from there

Add a pop up to make sure someone made a meal if they never clicked it.

Add a I don't have this button and allow editing of the pantry from there.

Can we use cloud code?
