1. List of questions in expected order to be asked
  - a. Please tell us about your app idea? (Breeanna Schlicker)
  - b. Who are the users of your app? (Maci Dostaler)
  - c. What data should the app collect? (Maci Dostaler)
  - d. Where data should be stored? (Clay, if not answered earlier)
  - e. When or where will the app be used? (Breeanna Schlicker)
  - f. What information or content does the app show the user? (Breeanna Schlicker)
  - g. Do you have any documents such as flyers, forms, or spreadsheets that you can share with us? (Breeanna Schlicker)
  - h. Where should the AI pull recipes from? (Maci Dostaler)
    - i. Do you want the LLM trained on recipes or have the AI grab from the Web? (Maci Dostaler)
    - ii. JSON to JSON?
  - i. Preferred Design ideas: graphical, text-based (Clay, hopefully will be answered earlier)
  - ~~j. Do we need user accounts? (Clay)~~
  - k. Level of automation for grocery shopping list, does it base it off of previously bought items, keep track of amounts (might be answered in data collection question), recommend items based on other items they have that would make new recipes?
2. Conclude interview
  - Summarize the major findings of the interview.
  - Ask your scientists if they have any questions or comments that they like to make.

Recipe Builder Scientist Meeting

August Miller

January 14th, 8am CST (9am EST) - [zoom](#)

- Tell your scientists that you will email them a summary of the meeting describing your understanding of the app.
- Confirm your date, time and media for your second interview with your scientist.
  - Jan 21st, same time
- Thank your scientists for the interview.
