

Scientist Name: August Miller
Meeting: January 21st 8am CST (9am EST)
Via Zoom
Team Members and Roles

Name	Role
Breeanna Schlicker	Host
Zach Starry	Note taker
Andrew Sadler	Interviewer
Julie Truckenbrod	Note taker
Clay Urbaniak	User Experience
Maci Dostaler	Interview
Grant Willison	User Experience

Questions

- ~~1. How should the JSON for recipes be formatted? Just like the schema - Clay~~
2. You talked about how user input should be formatted as a JSON file when entering ingredients into the AI agent, can you elaborate on this?
3. The current "page" list is AI agent, recipe repository/filtering, grocery list, and pantry, is this right? Any more pages? Less?
4. Should the recipes that the AI pulls be only recipes the user input themselves? Or should the app have some "default" recipes that the user can pull from? - Andrew
5. For Open AI, API usage costs money for words processed, while it does provide some free tokens for new users it will most likely not last the duration of the project, do you have any other recommendations for AI agents? - Andrew
6. When should the items get removed from the pantry; having a cook recipe button. Have a display for the week of planned meal; potentially having eat-out/leftovers has a filler space? -Clay
7. Any additional resources you think we should use? - Breeanna
